ADVICES FOR USE AND DURATION REFILL FOR WOODEN STICKS DIFFUSER

The duration of a fragrance depends on the characteristics of the ambient in which it is located, its size, its temperature, direct sunlight and air currents that can accelerate evaporation.

Be careful not to spill the fragrance as some types of surfaces may get damaged. In such a case, we suggest to clean immediately.

The color of the fragrance may vary over the time due to the natural process of maturation.

For a proper use of the products, carefully follow the instructions for use on the package.
